

Mission Statement :

Our purpose is to work with clients to build trust and provide quality service that promotes professionalism, ensures fiscal responsibility, prevent crime, reduce the fear of crime, and promote safety.

Protection Management is your full service and independent professional security consultant agency.

We believe that those individuals and businesses that are seeking a consultant should use the services of a firm that is unbiased and unaffiliated with any equipment manufactures/installers, or security staffing firms, so the client will not receive recommendations based on the consultants "bottom-line." At Protection Management, we will not make recommendations based on trying to sell you a service or product. Protection Management is here to make recommendations for improvements and cost savings, and to assist your company with all their security planning, development, and training needs.

The decision to outsource consulting services for a company may not be an easy one, but it makes good business sense. A professional security practitioner can find risks you may not have ever anticipated.

Certified Protection Professional (CPP)
Throughout the world, the Certified Protection Professional (CPP) designation is acknowledged as the security profession's highest recognition of practitioners. It is evidence that an individual is "Board Certified in Security Management." The CPP is awarded based upon experience and passage of an examination that provides an objective measure of an individual's broad based knowledge and competency in security management. Ongoing professional development is required in order to maintain the credential. The CPP is administered by the ASIS International, the preeminent international organization for security professionals, with 32,000 members worldwide.
